

**REMARKS**

Claims 1-23 are all the claims pending in the application. This Amendment amends claim 18, adds claims 23, and withdraws claims 10-22 from consideration pursuant to the election of species requirement. Consideration on the merits is respectfully requested.

In the Office Action dated October 1, 2004, the examiner asserted that the claims are directed to three patently distinct species:

**Species I**, which the examiner indicates is described in independent claim 1.

**Species II**, which the examiner indicates is described in independent claim 10.

**Species III**, which the examiner indicates is described in independent claim 18.

**Applicants elect Species I for examination, comprising independent claim 1, and dependent claims 2-9.**

With regard to **Species I**, the examiner characterizes claim 1 as being directed to “a regular light emitting diode.” Applicants wish to point out that claim 1 does not recite a “diode,” but rather, more broadly recites a “light emitting device.” One embodiment of the light emitting device is “an organic light emitting device,” as more narrowly described in dependent claim 9.

Withdrawn claim 18, associated with non-elected **Species III**, is amended to include:

“circuitry connected to the each of the first, second, third, and fourth power lines, the circuitry being capable of individually controlling a power signal transmitted through each respective power line”.

New claim 23 is added. Applicants respectfully submit that claim 23 is generic to both **Species I** and **Species III** (as amended). Entry and consideration of claim 23 are respectfully requested.

U.S. Application No. 10/607,138  
Amendment and Election of Species dated November 1, 2004
